UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS
General Certificate of Education Ordinary Level

CANDIDATE NAME

CENTRE NUMBER | | | | | |

CANDIDATE NUMBER | | | | |

7723706086

CHEMISTRY **5070/02**

Paper 2 Theory **May/June 2009**

1 hour 30 minutes

Candidates answer on the Question Paper

No additional materials are required

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.
Write in dark blue or black pen.
You may use a soft pencil for any diagrams, graphs or rough working.
Do **not** use staples, paper clips, highlighters, glue or correction fluid.
DO **NOT** WRITE IN ANY BARCODES.

Section A
Answer **all** questions.
Write your answers in the spaces provided in the Question Paper.

Section B
Answer any **three** questions.
Write your answers in the spaces provided in the Question Paper.

A copy of the Periodic Table is printed on page 16.
At the end of the examination, fasten all your work securely together.
The number of marks is given in brackets [ ] at the end of each question or part question.

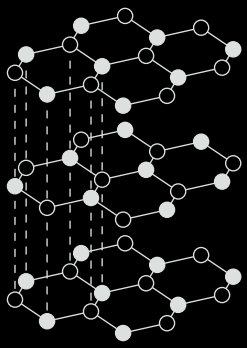

For Examiner's Use	
Section A	
B8	
B9	
B10	
B11	
Total	

This document consists of **16** printed pages.

structure **A**

structure **B**

These two forms of boron nitride resemble two allotropes of carbon.

(a) Suggest why boron nitride with structure **A** can be used as a lubricant.

.....

.....

.....

.....[2]

(b) Suggest why boron nitride with structure **B** does **not** conduct electricity.

.....

.....[1]

(c) Suggest why boron nitride with structure **B** can be used in cutting tools and drill bits.

.....

.....

.....

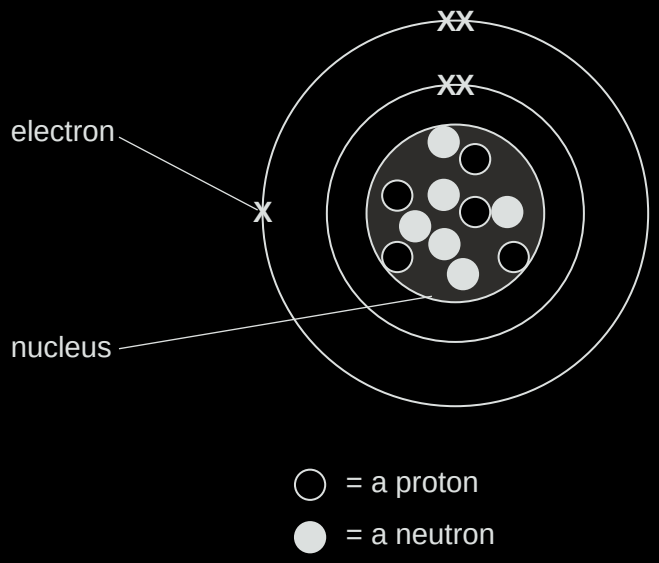

.....[2]

[Total: 5]

www.PapaCambridge.com

(a) Complete the table.

sub-atomic particle	relative charge	relative mass
electron	–1	
neutron		
proton		1

[2]

(b) Carbon-12 has the symbol $^{12}_{6}C$.
Write the symbol for an atom of element **X**.

.....[2]

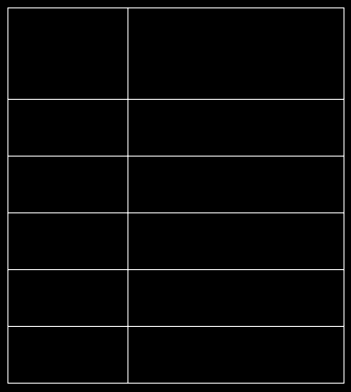

(c) Draw a diagram to show the atomic structure of **another** isotope of element **X**.

[2]

[Total: 6]

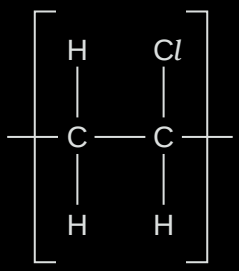

www.PapaCambridge.com

www.PapaCambridge.com

(a) Draw the structure of the monomer used to make poly(chloroethene).

[1]

(b) One way to dispose of solid household waste is to burn it at a high temperature. The burning of poly(chloroethene) gives the waste gases hydrogen chloride, carbon dioxide and water.

(i) Balance the following equation to show the burning of poly(chloroethene).

$$\ldots\!.\text{–}C_2H_3Cl\text{–} + \ldots\!.O_2 \rightarrow \ldots\!.HCl + \ldots\!.CO_2 + \ldots\!.H_2O$$

[1]

(ii) Hydrogen chloride gas is removed from the waste gases by reacting with moist powdered calcium carbonate. Name the solid product formed.

.....[1]

(c) Name and state the use of a man-made condensation polymer.

name of condensation polymer .....

use of condensation polymer .....[2]
