Alternative to Coursework

October/November 2008

1 hour 30 minutes

Candidates answer on the Question Paper

Additional Materials: Ruler

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.
Write in dark blue or black pen.
You may use a soft pencil for any diagrams, graphs or rough working.
Do not use staples, paper clips, highlighters, glue or correction fluid.
DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.
Study the appropriate Source materials before you start to write your answers.
Credit will be given for appropriate selection and use of data in your answers and for relevant interpretation of these data. Suggestions for data sources are given in some questions.
You may use the source data to draw diagrams and graphs or to do calculations to illustrate your answers.

At the end of the examination, fasten all your work securely together.
The number of marks is given in brackets [ ] at the end of each question or part question.

For Examiner's Use

This document consists of **16** printed pages.

Fig. 3 Shipbreaking

Ship breaking takes place on plots rented for one year from the Mumbai Port Authority. Ships from all over the world are beached at high tide and cut up for scrap iron and other metals using large gas torch cutters.

This activity is not carefully regulated and people work up to 84 hours a week. They are given no safety training usually.

(a) (i) About 3000 people are employed in ship breaking in Mumbai. The men earn 150 rupees a day. Each ship has a small team of women collecting scraps of metal, for which they earn 50 rupees a day. How much would be earned in seven days by

a man, ...

a woman? ..... [2]

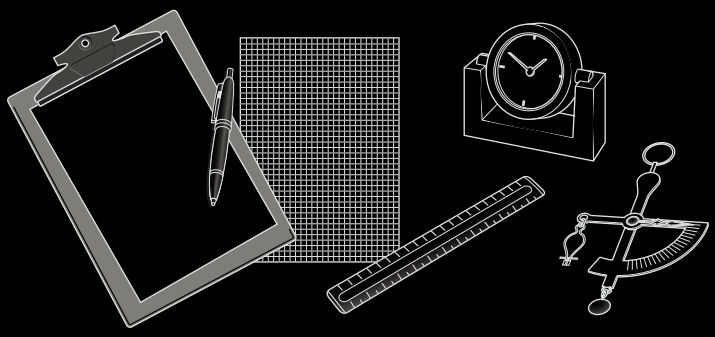

Fig. 8 Some equipment used by students

Plan One
A student stands at a point P and counts how many cardboard and plastic collectors can be seen in one hour. The student writes down how big a pile of material has been collected.

Plan Two
There are four students; one of them stands at each of four sample points P, Q, R and S for three hours. The students asks each collector to tell them the weight of cardboard collected.

Plan Three
There are four students; one student stands at each of four samples points P, Q, R and S for three hours. The students weighed all the cardboard and plastic.

(a) **(i)** Why is Plan One unreliable?

.....[1]

(ii) Explain why Plan Two is an improvement on Plan One.

.....

.....[2]

(iii) Explain why Plan Three is the best.

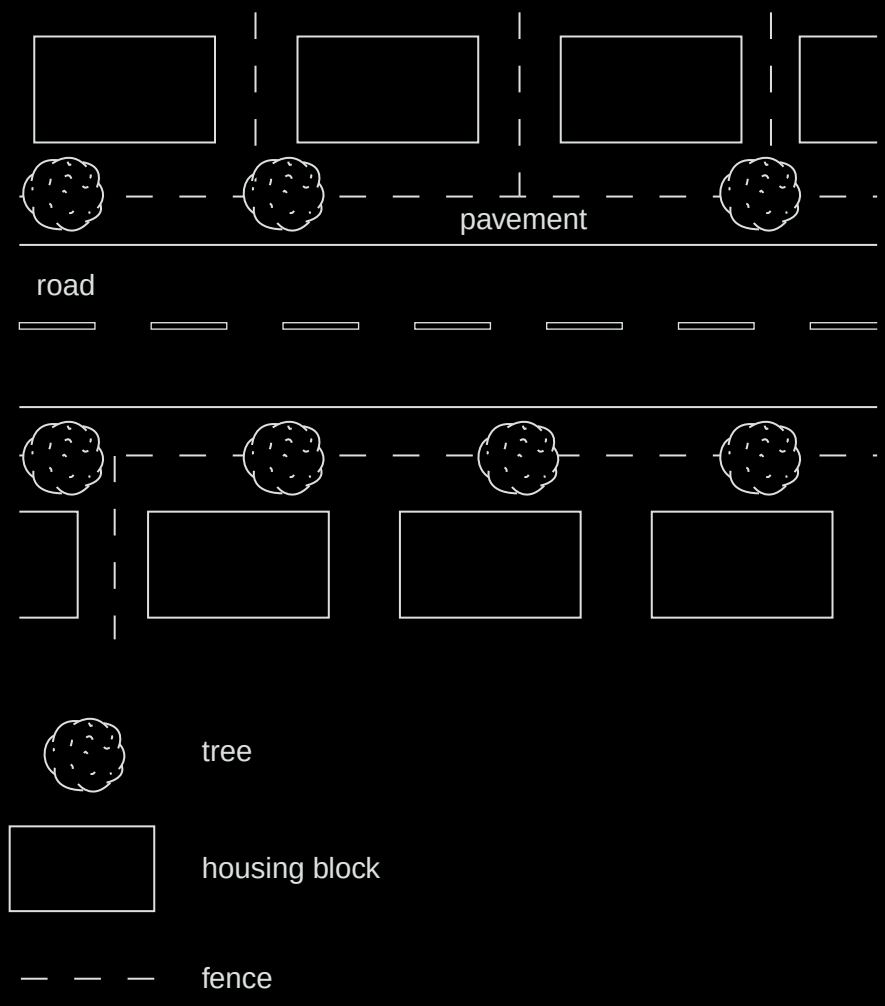

Fig. 11

The student has four thermometers and four volunteers to take the readings. The student tells them to each take eight readings.

(i) Place an X on Fig. 11 in four places, to show a good position for each thermometer. [2]

(ii) Suggest **two** ways the student can make sure this experiment is accurately carried out.
